This compilation of information is intended to illustrate the landscape for Palm Beach County children and families. Information is organized and presented to align with the Birth to 22 Palm Beach County Steps to Success. Data was obtained and prepared by Child Youth & Community Data Team of the Birth to 22 Palm Beach County Initiative and contributing partners.

Steps to Success

The Steps to Success represent 6 domains of child and youth development – physical health, behavioral health, academic readiness, social/emotional well-being, career readiness and connection and contribution to community and society. These steps represent key markers of success that allows us to access developmental outcomes. As children and youth make their way up these stairs, we are able to track their progress or lack thereof. The indicators, or measures, for these different areas are shown above the stair steps in the green text (for things we are trying to promote) and orange text (for things we are trying to prevent). Understanding what this data looks like for different subpopulations within Palm Beach County is also essential. In order to achieve those outcomes, children and youth need key supports along the way, through a combination of effective parenting and safe and nurturing families and communities. A sample of possible measures are listed below.

Steps to Success & Supports for Success

Community Context

Indicators

- Number & Percent of Palm Beach County Population By Race
- Percent of Palm Beach County Children Living in Poverty By Race
- Percent Comparison of State & County SNAP Participation By Selected Household Characteristics
- Number & Percent of Palm Beach County Population by Age Group, Poverty Level & Geographic Area
- Palm Beach County Food Insecurity & Access to Pantries
- Municipalities with Highest Crime Rates in Palm Beach County
- Number of Homeless Students in Palm Beach County Schools
- Number & Percent of Homeless Youth Served by Palm Beach County Programs

*Food Insecurity Need Index is a composite index based on 10 indicators associated with insufficient access to food. Geographic areas are ranked relative to comparison to the county. Index scores range between 0 and 1.0, with 1.0 being the highest need index. The numbers presented in the table reflect the average across census tracts in the Jupiter and Loxahatchee zip code areas of high food insecurity.

** With the exception of 33405, 33407, 33410, and 33418, remaining zip codes in West Palm Beach have a Food Insecurity Need Index of 0.9.

Ready for School

Percentage of Palm Beach County Children Ready for School

92% in FY 2016

to

90% in FY 2017

*School Readiness data for 2014 and 2015 were not included for cross year comparisons due to the following reasons. 1) For 2014, no kindergarten readiness data were available since the state did not release the data. 2) For 2015, the kindergarten readiness result was inconsistent with the previous years. In 2015, the Florida Kindergarten Readiness Screener (FLKRS) replaced the previous measurement tool which included both the Early Childhood Observation System (ECHOS) and the Florida Assessments for Instruction in Reading -Kindergarten (FAIR-K) from 2011 to 2013 with the Work Sampling System (WSS). The WSS measures were quite different from the ECHOS and FAIR measures which resulted in a much higher percentage of the students who were deemed ready for kindergarten than the previous years by about twenty percentage points on average. Access to Afterschool Programming

Indicators

- Quality Improvement System (QIS) Description and Rationale
- Number of Children Attending Afterschool, QIS Participating Programs or Designated High Quality Centers FY 2014 - FY 2016

Access to Afterschool Programming

✓ **The Quality Improvement System (QIS)**

Through the *Palm Beach County Quality Improvement System*, afterschool programs receive **coaching, training and other Prime Time supports** designed to improve quality. Programs also create an **improvement plan** each year and learn to assess their own performance.

✓ **What is High Quality?**

High quality programs provide a **supportive and engaging environment for youth**. Program quality is assessed each year using the **Palm Beach County Program Quality Assessment (PBC-PQA)**. Scores on the assessment range from 1 to 5, and average scores of 4.1 or above are considered “high quality.”

✓ **Why Quality Matters**

Prime Time’s work is rooted in a wide body of research demonstrating that **quality OST programs lead to substantial academic, social, and emotional benefits for youth**. These benefits include higher grades, improved standardized test scores, on-time grade promotion, reduced dropout rates, and increased school day attendance in programs throughout the country.¹ Programs that attend to the social and emotional needs of youth lead to skill development, well-being, prosocial behavior, as well as improved academic performance.² Importantly, **program quality is often critical for seeing benefits**. In many cases, no benefits are seen unless a program is of high quality.³

✓ **Access to High Quality**

In the 2016-2017 QIS cycle, 74% of QIS programs significantly improved in quality **OR** maintained high quality.

✓ **In Palm Beach County, high quality OST programs lead more youth to move to the next grade level on time** compared to low quality programs.⁴
